3R VENTILATION GRILLES

Baffle should extend approximately 6" beyond left and right ends of grille.

If water enters baffle area, it drains out through the weep holes in the enclosure front.

Application: Same ventilation grilles as used on Boltswitch Type 3R Fused Power-Circuit Device Enclosures. Suitable for most switchboard and panelboard applications.

Design: V-shaped louvers are closely spaced, deter most water and insects and are incredibly strong, yet still allow excellent air flow. Product is 100% aluminum. White painted finish is optional.
